1 In general, the work consists of: elevator upgrades to three hydraulic passenger elevators. One of the
2 elevators has recently been upgraded (2016) and will receive minor work. This elevator shall receive a new
3 controller to communicate and coordinate with the two remaining passenger elevators needing upgrading.
4 The two remaining passenger elevators will be upgraded to match to the recently upgraded elevator.
5 Upgrades for the two elevators will include door operators, hydraulic power units/system replacement, car
6 top handrails, microprocessor controllers, wiring, pumps, door hardware, cab lights and fan, etc. Elevators
7 1, 2 and 3 will receive new hoist-way doors and new cab doors and coordinator hardware along with full-
8 height, non-contact, infrared door detector. Elevator 1 and 3 have received a new hydraulic cylinder.
9 Therefor Elevator 2 will be the only elevator needing removal/replacement of a hydraulic cylinder. The
