51 In general the work of this project consists of the remodel for various bathroom spaces in the CRSP building so that
52 they are ADA compliant and more accessible for an aging population. This project will address the decommissioning

1 and infilling of an abandoned indoor swimming pool. Select classrooms will be modified to convert smaller individual
2 areas into larger programming space.

3
4 The CRSP (Center for Residential Services and Programing) building at Southern Wisconsin Center was built in the
5 mid-1950s and designed as a school for ambulatory children. In the 1980s the programming need shifted to support
6 an older population that involves resident skills training. The typical existing restrooms were designed to
7 accommodate children and are too small and inadequate to support existing adult resident needs.

8
9 Existing domestic water, cast iron waste piping and vents shall be replaced and associated asbestos will be abated.
