42 In general the work consists of renovating the existing Building 6 on the Central Wisconsin Center (CWC)
43 campus. The existing masonry construction one-story building with a lower level contains 46,377 gross
44 square feet and was constructed in 1963. The building will be used for either long- or short-term care for
45 CWC residents or for civil geriatric psychiatric patients currently cared for at Mendota Mental Health
46 Institute (MMHI). This project will correct Life Safety Code deficiencies that were identified during a
47 2008 regulatory inspection and includes the installation of a fire sprinkler protection system. Mechanical,
48 plumbing, electrical, low voltage and security systems will be replaced to bring them up to current
49 requirements. The building envelope will be updated including insulating all exterior walls and installing
50 psychiatric windows. The project includes demolition and remodel of the first floor and selective
51 remodeling in the basement. The building is planned as an inpatient behavioral health hospital and will
52 provide two (15) bed patient units each with a nurse station, activity spaces, dining room and support
53 spaces. The first floor will be I-2 occupancy. The lower level will be Business occupancy housing staff
54 and building support spaces. The main entrance to the building will be relocated to an accessible route on

1 the south side facing the access drive. Site work includes replacement of existing ramps to meet ADA and
2 various sidewalk changes to provide more accessible routes. Exterior and adjacent site lighting will be
3 upgraded. Outdoor enclosed courtyards will also be developed for patient use.
